

Multi-Walled Carbon Nanotubes

Background information

Description

Multi-walled carbon nanotubes of reduced length.

Main Applications

Designed for research and development of polymer composites, adhesives, inks and coatings with given functionalities in which nanotubes are used as dispersed phase changing electrical, mechanical and adhesive properties of continuous phase.

Benefits

- Good thermal conductivity
- Purity
- Hydrophobicity

Technical data

Specific characterization

Properties	Unit of measure	Value	Methods of evaluation
Average diameter	nm	10 ÷ 30	SEM, TEM
Average length	µm	1 ÷ 2	SEM
MWCNT content	wt. %	>99	TGA
Metal oxide content (Fe, Mg, Cu)	wt. %	<1	TGA, SEM-EDX
Specific surface	m ² /g	74,0	BET

Characteristics

Commercial/Safety Information

Packing

Multi-walled carbon nanotubes are available in bottle with double caps in quantities 5 g.

Ordering

You can order the product via <https://shop.carbon4nano.com/>

Health and Safety

Material Safety Data Sheets is available to provide both workers and emergency personnel with the proper procedures for handling or working with the product. This document includes information such as physical data (form and color, melting point, etc.), handling and storage recommendations, first aid measures and ecological information. The Safety Data Sheet is provided with any order and should be observed.
